- REAL-TIME JOB STATUS
- SIGNATURE CAPTURE & SCANNING
- WEB BASED OPERATIONS INTERFACE
- GPS LOCATION SERVICES
- BUSINESS EVENT MANAGER
- OVER THE AIR MANAGEMENT

InterDev's Xmotion® Transporta mobility software offers a proven, powerful and cost effective mobility solution for your business. Xmotion® Transporta has been deployed by leading Transport and Logistics companies in diverse operations including courier, liquids and fuels, container and bulk load.

Benefits of Xmotion® Transporta

- Reduce costs by eliminating duplication of keyboard entry tasks
- Integrate easily into most business systems therefore reducing the costs of implementation
- Remove delays in data collection to speed-up your billing process
- Retain customers and win new business based on your technology investment
- Enhance customer service through realtime status of jobs in progress
- Xmotion® Transporta offers the most flexible and powerful mobile solution for your transport and logistics needs
- Customise Xmotion® Transporta to suit your business without the need for software development

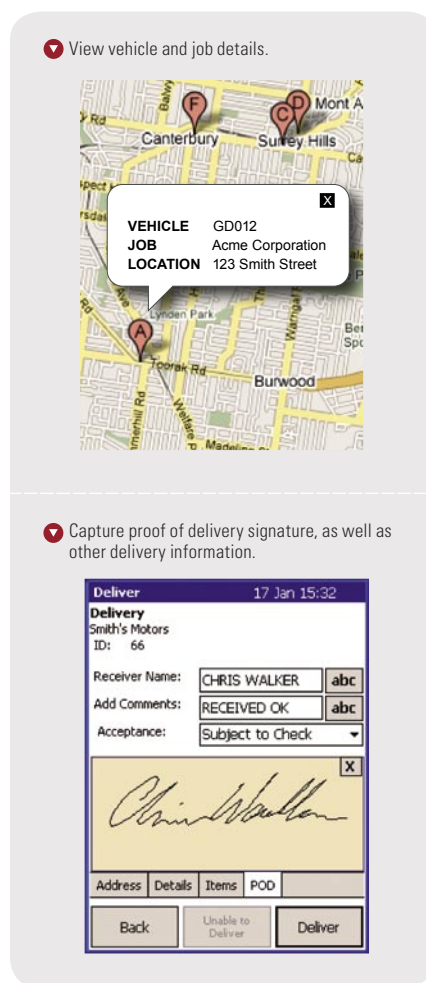

- Choose a hosted solution with no servers required on-site, or choose a traditional on site solution

The Xmotion® difference

- Support for devices ranging from ruggedised PDA's to Tablet devices
- Flexible business models including:
 - Point to Point
 - Pickup only
 - Delivery Only
 - Multi-Drop
 - Multi-Leg
 - LCL and FCL
- Simple and open integration to business systems
- Guaranteed data delivery
- Customise Transporta through configuration – not software development
- Extensive management tools
- Upgrade software 'over the air' rather than return to base

'Customer enquiries can be handled more efficiently, reducing the length of phone calls and the number of call backs required'

Xmotion® Transporta Standard Edition

- Electronic job dispatch, job cancellation and re-allocation in real time over GPRS and wireless networks
- Job history (including signature capture) and all delivery status events
- Real time job status and location of vehicles
- See when your drivers have arrived and departed customer sites
- See the jobs that have not been allocated or completed
- Manage reallocation of work instantly from vehicle to vehicle
- Details about collected freight can be captured at time of pickup including barcode scanning, saving time on data entry

Xmotion® Events

- Business Event Management to define and capture important events such as extended wait times, late deliveries, missed pickups
- Advance notice to customers of impending deliveries
- Capture when important job details change such as additional items, missing items
- Nominate and capture important transactions (such as late delivery to a particular location) and action them by email, SMS, reports or other methods

Xmotion® MYOB

- Integrate seamlessly to MYOB to manage customers and billing
- Capture transport events as billing records

Xmotion® Phone Services

- Use the mobile device as a mobile phone
- Restrict calling numbers
- Maintain lists of authorised numbers and distribute from a central location
- Automatically turn the phone off when vehicle is moving

Xmotion® Transmate

- Integrate to the Freightmate transport management system
- Despatch and manage jobs directly from Freightmate
